MAINS CABLE
CLEARER AUDIO
COPPER-LINE
ALPHA CABLE

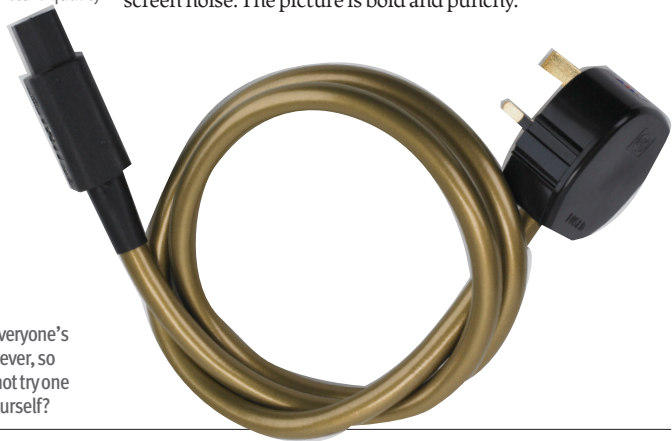

£ 35

VERDICT

An affordable upgrade that gives a boost to sound and picture quality

THE WORLD OF mains cables can be a minefield at the best of times but the Copper-line Alpha is the real deal.

It draws on the design of Clearer Audio's more expensive Copper-line mains cable and its pedigree is immediately obvious. Plugged into our Cyrus CD6se CD player, you can hear greater clarity and detail with music. The low frequencies of *The Dark Knight* OST sound bolder and have a significantly stronger impact compared to the standard mains cable. Hook the Copper-line Alpha up to a flatscreen TV and you'll see an improvement in image clarity and a reduced on-screen noise. The picture is bold and punchy.

Not everyone's a believer, so why not try one for yourself?
